MANAGEMENT'S DISCUSSION AND ANALYSIS

Global Economy Overview

The global economy remained lackluster in 2015 with growth slowing down to just 3.1% compared to 3.4% in 2014 (as per latest IMF estimates). This marks the slowest pace of expansion since the global financial crisis in 2009 and the fourth successive year that the global economy has grown at a rate lower than its long term average of 3.6 p.a. The Emerging Market & Developing economies witnessed further deceleration in growth from 4.6% in 2014 to 4.0% in 2015 with the Chinese economy slowing down from 7.3% in 2014 to 6.9% in 2015 and other major constituent economies like Brazil and Russia witnessing contraction.

The Advanced Economies, on the other hand, recorded a marginal uptick in growth from 1.8% in 2014 to 1.9% in 2015. The US economy posted a muted growth of 2.4% for the second year in a row due to weak exports and decline in investments. The pace of economic activity improved in the Euro Area which grew by 1.6% during the year compared to 0.09% in 2014, aided by strengthening domestic demand and supportive financial condition.

Recovery in global economic activity is expected to remain subdued over the near/medium term with only a modest cyclical uptick to 3.2% in 2016 and 3.5% in 2017 as per IMF estimates.

Indian Economy Overview

The Indian economy witnessed another challenging year growing by 7.5% during the fiscal year 2016 representing a marginal improvement over fiscal year 2015 (7.2%). Inflation is largely under control the consumer price index is expected to fall within the range of 5-6 percent and Wholesale Price Index, virtually nil. Our current account deficit is also under control. The implementation of transformative structural reforms such as the Goods and Service Tax, however, is imperative to fast track economic growth and boost consumer confidence.

Industrial Structure & Developments

The primary business of your Company is processing of oilseeds and refining of crude oil for edible use. Indian edible oil industry is the world's fourth-largest industry after USA, China and Brazil and accounts for around 9% of the world's oil seed production. It is highly fragmented with extreme variation in the consumption pattern of Indian consumers of edible oils. The Indian edible oil industry continues to be underpenetrated

and thereby holds immense business opportunities. Vegetable oil consumption has increased due to rise in overall household income, surging retail sector, increasing health awareness, growing population and increasing demand. In India, oilseeds are grown in nearly 26-27 million hectares. The productivity is however very low in comparison with the world average. The consumption growth is rising by nearly 5.5 to 6.0% per annum. Palm Oil is consumed the most by lower income category of Indian society. Consumption of Palm oil in India is now nearly 45% of the total oil consumption followed by Soyabean oil and Rapeseed oil. Also the Indian edible oil demand is quite elastic and does not reduce or increase to an extent with change in prices. Import of edible oil has increased nearly 2.5 times in last 8 years. The central government allowed 100% FDI in oil palm plantations which is one of the important steps in helping fill the gap of edible oil deficit in India. The alarming decline of Indian oilseeds production and crushing are going along with booming import demand for vegetable oils, have brought oil meal exports from India almost to a standstill.

Industry Outlook

India has been an importer of edible oil for many years because of a mismatch between demand and domestic production. The palm cultivation has not taken off in the country on expected lines. Though, the per-capita consumption of edible oils is still a lot below threshold level of consumption. High growth in income levels, increasing trend in spending & better living standards may push the growth. Of late, consumption of edible oil in the country has started growing at around five percent a year. It, coupled with the limited availability of oil seeds and shifting of acreage to other crops, has resulted in the widening of supply-demand gap in the domestic market. The domestic production of oilseeds has been declining in the last two years as farmers are no longer interested in growing the crop which has become unremunerative. The shortage of raw material and capacity utilization have further deprived the industry of gaining production and productivity, thus making the industry less competitive in the global market. Provided the positive macro and demographic fundamentals, the edible oil market has a favorable demand growth outlook over the medium-to-long term. A lot will however depend upon the long-term actions of the government for the growth and development of the sector. The increase of import duty on edible oil and provisions for extra incentives in the coming budget will further provide impetus to the industry.

Opportunities and threat, Risk & concerns

Growth in the Indian economy and demand creates unprecedented opportunities for company to invest significantly in each of its core businesses.

The direct risks are from the monsoon outlook, domestic and international production figures of mustard seeds, soybean crop, palm oil, supply and demand gap of beans and products thereof and the government policies affecting rate of interest and duties applicable on the traded commodities. This year has recorded improvement in the rupee in compare to last year and thus your company is exposed lower risks arising from volatility in forex market in compare to last year. Company is using all beneficial financial instruments to hedge against direct risks. Risk management techniques have been deployed at every level to ensure the competitiveness of the company without making itself vulnerable to macro as well as micro risks. All the indirect risks viz. labor management, natural calamity, etc. are dealt in the best possible manner safeguarding an efficient working environment throughout the organization culture. Accountability is very well defined in the organizational structure and that leads to enhanced performance on the whole in event of unforeseen risks the company would rely on the experience and dedication of its board to tackle any issues that may affect its performance.

"Annexure-A" to Independent Auditor's Report

Referred to in paragraph 1(f) under the heading "Report on other legal and regulatory requirements" of our report of even date.

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the Internal Financial Control over financial reporting of **Vijay Solvex Ltd.** (hereinafter referred to as "the Holding Company") as of 31st March, 2016 in conjunction with our audit of the consolidated financial statements of the Company for the year then ended.

Management's Responsibility for Internal Financial Control

The respective Board of Directors of the Holding company is responsible for establishing and Maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (ICAI). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business,

including adherence to the respective company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing issued by ICAI and deemed to be prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls, both issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate Internal Financial Controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the

maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Holding Company have, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31st March, 2016, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the ICAI.
